

Band Presents Free Concert for Lovers of Music and Animals

Woof! Growl! Roar! Bring the entire family to a musical tribute to our animal friends. Dogs on leashes are invited to attend!

The Keys Community Concert Band welcomes guest conductor Joseph Rayhill to the podium. A graduate of the University of Central Florida, and former Band Director in Jacksonville, Rayhill is presently Director of Bands at Marathon Middle/High School.

Rayhill looks forward to conducting the Band, and encourages parents to bring their children to the concert. "As a music teacher, I hope my students will continue to make music throughout their lives. When younger children hear a band performance, they may be inspired to join school band when it's time for them to make that decision. One band concert can change a kid's life because kids can't choose what they don't know."

On the program are crowd-pleasing pieces such as *Baby*

Elephant Walks New York, Alley Cat, Rubber Duckie, Teddy Bear's Picnic, and a rousing Sousa march, The Black Horse Troop. Young and young-at-heart attendees will have the opportunity to join the Band for a musical selection.

The *Pops in the Park* series is funded, in part, by a grant from the Monroe County Tourist Development Council, administered by the Florida Keys Council of the Arts. The Hurlburt Family Foundation and other local organizations provide additional funding. Donations are always welcome!

Come to *Animal Fair* on February 18, 4:00 p.m., at the Capital Bank Amphitheater at Founders Park, MM 87, Islamorada. Bring family, friends, and a blanket or lawn chair, sit by the Bay and enjoy the free concert. For

further information, call (305)853-7294 or find the Band on Facebook.

Adopt a Key Largo Animal Shelter Pet

Meet a few of the animals who are currently available for adoption at the Key Largo Animal Shelter. If you are interested in taking one of these adorable furry friends home stop by or call. The Shelter is located at mile marker 106 Oceanside; phone 305-451-0088.

Valentine's Day Trivia: The Truth about Kissing

The science of kissing is called philematology.

Lips are 100 times more sensitive than the tips of the fingers.

A real kiss may quicken the pulse to 100 beats in a minute.

A French kiss moves about 29 muscles in the face.

The world's longest kiss took place in New York City, lasting 30 hours, 59 minutes, and 27 seconds.

It is thought that men who kiss their wives every morning before going to work live 5 years longer than men who don't.

70% of people aged 16 to 24 years had their first kiss by the age 15, whereas only 46% of their parents had kissed by the same age.

Couples may transfer an average of 9 milligrams of water, 0.7 milligrams of protein, 0.18 milligrams of organic matter, 0.71 milligrams of fat and 0.45 milligrams of salt to each other with each open-mouthed kiss.

It is said that an average woman kisses about 29 men before getting married.

A kiss can contain up to 278 of different bacteria, most of which are non-dangerous.

An average person spends two weeks of his or her life kissing.

Two out of every three couples turn their heads to

the right when they kiss.

On Valentine's Day 2004, 5,122 Philippine couples gathered together at midnight and locked lips. This kissathon beat the previous world record of 4,445 couples set in January in Chile.

You burn 26 calories in a one minute kiss.

Kissing releases the same neurotransmitters (chemical messengers in the brain) as those that are released when you engage in intense exercise such as running a marathon or skydiving. This causes your heart to beat faster and your breathing to become deep and irregular.

Some theorize that when you kiss a person with the same hair color as yourself, the result is a more passionate kiss.

Our brains have special neurons that help us find each others lips in the dark.

There are many strange laws regarding kissing that are still on the books. In Indiana, it is illegal for a man with a moustache to "habitually kiss human beings". And in Hartford, CT, it is illegal for a man to kiss his wife on a Sunday.

Eskimos, Polynesians and Malaysians rub noses instead of kissing.

Kissing helps reduce tooth decay because the extra saliva it creates helps clean out the mouth.
