Winners of a Recent Theory Contest

HONOURABLE MENTION:

The quantity of consonants in the English language is constant. If omitted in one place, they turn up in another. When a Bostonian "pahks" his "cah," the lost r's migrate southwest, causing a Texan to "warsh" his car and invest in "erl wells."

RUNNERS-UP:

#4 The earth may spin faster on its axis due to deforestation. Just as a figure skater's rate of spin increases when the arms are brought in close to the body, the cutting of tall trees may cause our planet to spin dangerously fast.

#3 Communist China is technologically underdeveloped because they have no alphabet and therefore cannot use acronyms to communicate

ideas at a faster rate.

#2 Why Yawning Is Contagious: You yawn to equalize the pressure on your eardrums. This pressure change outside your eardrums unbalances other people's ear pressures, so they must yawn to even it out.

#1 If an infinite number of rednecks riding in an infinite number of pickup trucks fire an infinite number of shotgun rounds at an infinite number of highway signs, they will eventually produce all the world's great literary works in Braille.

GRAND PRIZE WINNER:

When a cat is dropped, it always lands on its feet, and when toast is dropped, it always lands with the buttered side facing down. So we could strap buttered toast to

the back of a cat; the two will buttered cat array, a high-hover, spinning inches above the ground. With a giant speed monorail could easily link New York with Chicago.
